

Cristina Cantarutti

Nationality: Italian

Born in San Daniele del Friuli (Italy), July 12th 1990

Present occupation

Jan 2022-
present Research Associate (**Ricercatore a tempo determinate tipo A**)
Biophysics group of the University of Udine (Italy)

Past experience

Sept 2021-Dic
2021 **Post-doc** at the **Biophysics group** of the University of Udine (Italy)
Supervisors: Prof. A. Corazza.
Project: NMR study of the interaction between TTR and ligands in human serum.

Sept 2020 –
Sept 2021 **Post-doc** at the **Biophysics group** of the University of Udine (Italy)
Supervisors: Prof. M. Zancani.
Project: Study of the interactions between OSCP and CyP-D in modulation of the mitochondrial permeability transition pore by NMR spectroscopy.
Parallel projects: a) investigation of TTR interaction with potential drug molecules by NMR; b) characterization of TDP43 N-terminal domain in collaboration with Prof. F. Chiti from University of Florence

Apr 2019 –
Dec 2019 **CNRS post-doc** at the Institut de Chimie de Nice of the University of Nice (**France**) in the **Equipe Matériaux et Polymères Eco-compatibles** (European project KaRMA2020).
Supervisor: Prof. A. Mija.
Project: molecular characterization of cross-linked polymer composites from renewable sources by IR and NMR spectroscopies.

Jan 2018 –
Jan 2019 **Post-doc** at the **Biophysics group** of the University of Udine (Italy) in collaboration with the cardio-surgery division of the Udine University Medical School
Supervisor: Prof. G. Esposito.
Project: metabolomics by NMR of blood samples from heart transplanted patients related to different organ conservation systems.

Career break

Aug 2018 – Maternity leave
Apr 2019

Academic education

- Nov 2014 – **PhD in Biomedical Sciences and Biotechnology** at the **Biophysics group** of the University of Udine (Italy). Supervisor: Prof. G. Esposito; co-supervisor: Prof. A. Corazza.
Oct 2017 Project: characterization of amyloidogenic protein stability, dynamics and molecular interactions with synthesized nanoparticles, molecular chaperones, supramolecular systems and small peptides.
PhD thesis “Challenging protein-nanoparticle interactions. Results with gold nanoparticle and β 2-microglobulin system”. Thesis defense: 02/03/2018.
- Jul 2014 **Master degree in Organic and Biomolecular Chemistry** at the University of Trieste (Italy).
Thesis in organic and nanomaterial chemistry: “Carbon nanotubes functionalization for biomedical applications”.
Supervisor: Prof. M. Prato; co-supervisor: Dr. S. Bosi.
Final grade: 110/110 with honours.
- Jul 2012 **Bachelor degree in Chemistry** at the University of Trieste (Italy).
Thesis in organic and nanomaterial chemistry: “Synthesis and characterization of hydrogenated/fluorinated mixed monolayer protected gold clusters”.
Supervisor: Prof. L. Pasquato; co-supervisor: Dr. S. Bidoggia.
Final grade: 110/110 with honours.

Research experience abroad during PhD

Two months at the New York University of Abu Dhabi (UAE) as a visiting PhD student.

Submitted papers:

- **Cantarutti C**, Mimmi MC, Verona G, Mandaliti W, Taylor GW, Mangione P, Giorgetti S, Bellotti V, Corazza A. Calcium binds to transthyretin with low affinity.

Membership

- GIDRM - Italian Group of Discussion concerning Magnetic Resonance
- INBB – National Institute of Biostructures and Biosystems (Interuniversity Consortium)

Awards and grants

Pfizer Research Grant Junior Investigator Global ATTR Amyloidosis Research (role: PI) – December 2022 - November 2024

Attendance grant for Italian-French International Conference on Magnetic Resonance – 27-30 September 2022, Milan IT

Young Researchers Fellowship for International Workshop on Advanced Isotopic Labelling Methods – 13-16 September 2022, Grenoble FR

Research topics

- **protein NMR** spectroscopy (two-dimensional experiments, chemical shift perturbation mapping, saturation transfer difference, diffusion ordered spectroscopy, trossy for rotational correlation time, amide exchange experiments, backbone dynamics analysis through ^{15}N relaxation experiments, reduced spectral density mapping, relaxation dispersion experiments, paramagnetic perturbation);
- basics of **protein molecular dynamics simulations**
- **small molecule NMR** (structure determination through mono- and two-dimensional homo- and hetero-nuclear experiments and conformation investigation through 1D and 2D NOE and ROE experiments);
- **NMR metabolic profiling** of plasma, serum and biopsies (mono-dimensional relaxation edited and two-dimensional experiments)
- molecular characterization of cross-linked polymer composites by **ATR-FTIR** and **NMR**;
- characterization of **protein molecular interactions** by techniques other than NMR such as **fluorescence** spectroscopy, **dynamic light scattering**, **UV-Vis** spectroscopy, microscopy (**AFM**, **TEM**), **quartz crystal microbalance** (QCMD) and **surface-enhanced Raman spectroscopy** (SERS);
- **protein amyloid aggregation** investigation by several techniques like **fluorescence** spectroscopy, **electron microscopy** and **soluble fraction analysis** (competence gained through a training at the Biochemistry Institute of the University of Pavia -Italy);
- **nanomaterials** (gold nanoparticles and carbon nanotubes) synthesis, functionalization and characterization (UV-Vis, TEM, AFM, TGA, DLS, ζ -potential);
- **organic synthesis, purification and characterization of organic compounds.**

Job-related skills

- **Calibration and acquisition** of NMR experiments, knowledge of **Bruker pulse programming**;
- use of **scientific data analysis softwares** (Origin, R, xmgrace, ImageJ), NMR processing and analysis softwares (Topspin, Sparky, NMRPipe, Mestrenova, Dynamics Center), chemical structure drawing programs (Chem Draw and Chem Draw 3D) and molecular graphics softwares (Pymol);
- use of **linux** environment and **bash scripting**;
- use of softwares to perform and analyse **MD simulations** (NAMD and VMD);
- knowledge of main **spectroscopic techniques** (NMR, UV-Vis, fluorescence, DLS, IR), microscopies (TEM, AFM), other characterization techniques like thermogravimetric analysis and mass spectrometry, QCMD and basic purification techniques (extraction and chromatography);

- **laboratory management** and attested **safety laboratory practice**;
- manipulation of **cryogenic** fluids;
- **communication skills** (oral and poster contributions, paper writing).

Schools, training and congresses

Aug 2021	CCPN Conference 2021
May 2021	<p>WebPro – Proteins on the Web 2021 organized by Società Italiana di Biochimica (Gruppo Proteine)</p> <p>Poster contribution: <u>Cristina Cantarutti</u>, Walter Mandaliti, Guglielmo Verona, Vittorio Bellotti, Patrizia Mangione, Mark B. Pepys, Alessandra Corazza</p> <p>Hydrogen-deuterium exchange reveals increased conformational fluctuations in the amyloidogenic V122I variant than in wild-type transthyretin</p>
Feb 2021 - Mar 2021	Bio-NMR training by Dr. Helena Kovacs from Bruker (theory and practice). Topics : triple resonance, side chain experiments, fast methods, relaxation and power handling, X-detected experiments and screening and binding.
Mar 2021	LINXS Amyloid Workshop - Heart and Mind: linking in vitro science to the clinical context
Oct 2020-Dic 2020	<p>Seminars on NMR relaxometry, University of Udine.</p> <p>Oral presentation: Relaxation dispersion methods.</p>
Oct 2020	Shell programming course (University of Udine)
Jan 2021	<p>Webinars on Emerging Topics in Biomolecular Magnetic Resonance : ‘Transient structures in IDPs from 3D NUS NMR of chemical denaturation’ Ad Bax (NIDDK/NIH) and ‘Time Travel to the Past and Future – Evolution of energy landscapes for enzymes catalysis’ Dorothee Kern (Brandeis University).</p>
Dec 2020	Webinar ‘NMR studies of the role of large-scale dynamics in the replication machinery of human RNA viruses’ Martin Blackledge (Institut de Biologie Structurale, UMR 5075, Grenoble)
Dec 2019	<p>Towards a cure for amyloid diseases: a successful example of precision and translational medicine. Pavia (Italy)</p> <p>Oral presentation as Invited Speaker Molecular knots: a possible approach to interfere with β2m fibrillogenesis.</p>
Mar 2018	<p>Statistics for Medicine and Biology course. Udine</p> <p>Advances in NMR and MS Based Metabolomics GIDRM congress. Padova</p>

- Nov 2017 **Poster contribution:** Cristina Cantarutti, Veronica Ferrara, Antonio Beltrami, Ugolino Livi, Sandro Sponga, Gennaro Esposito.
NMR metabolomics of blood samples from heart transplanted patients related to different organ conservation systems.
- Sept 2017 GIDRM XLVI National Congress on Magnetic Resonance. Salerno
Poster contribution: Cantarutti C, Wilson M.R., Carver J.A., G. Esposito G.
Hydrodynamics of β 2-microglobulin in presence of two molecular chaperones by NMR
- Jun 2017 GIDRM NMR Day: HR-MAS NMR, metabolomics and multivariate analysis. Milan
PhD Expo. Udine
- May 2017 **Poster contribution:** Cantarutti C, Raimondi S, Corazza A, Giorgetti S, Esposito G.
Citrate-stabilized Gold Nanoparticles hinder fibrillogenesis of a pathologic variant of β 2microglobulin
- Oct 2016 GIDRM Advanced NMR school: product operator formalism, pulse sequences, molecular motions, relaxation, diffusion, hyperpolarization, solid state NMR, MRI. Turin
- Sep 2016 Nanomedicine Congress, Viterbo
Poster contribution: Cantarutti C, Corazza A, Raimondi S, Giorgetti S, Bellotti V, Fogolari F, Esposito G, Effect of citrate stabilized gold nanoparticles on β 2-microglobulin fibrillation process.
- Sep 2016 International Summer School Nanoscience meets Metrology: Synthesis, Characterization, Testing and Applications of Validated Nanoparticles, Turin
Oral contribution: Cantarutti C, Corazza A, Raimondi S, Giorgetti S, Bellotti V, Fogolari F, Esposito G, Citrate gold nanoparticle interaction with β 2microglobulin: nanoparticle-protein adduct formation. (**Awarded between the three best oral presentations**)
- Feb 2016 International Chemistry Conference on Organic and Bioorganic Chemistry, Abu Dhabi
Poster and oral contribution: Cantarutti C, Corazza A, Raimondi S, Giorgetti S, Bellotti V, Fogolari F, Esposito G, Gold nanoparticles and amyloidogenic proteins: exploiting the interaction to avoid fibrillogenesis. (**Awarded as best poster presentation**)
- Sep 2013 Nanomedicine School, Trieste

Teaching and mentoring activities

- Dec 2020 Co-supervisor of Giovanni Crump bachelor thesis (University of Udine)
- Academic year 62 hours of Applied Physics for Health Professions courses (FIS/07). University of Udine

2021-2022

Feb – May 2021 Physics and Chemistry courses for Health Profession entrance exam. Liceo Uccellis, Udine

Oct 2020 Physics preparatory course, Health Professions course (FIS/07). University of Udine

Feb – May 2018 Chemistry course for Medicine entrance exam. Unid Formazione, Udine.

Nov – Dec
2017 Science teacher (J. Linussio high school, Codroipo UD)

Oct 2017 Physics preparatory course, Health Professions course (FIS/07). University of Udine.

Languages

Italian: mother tongue. **English:** advanced. **French:** pre-intermediate. **German:** pre-intermediate.
