Cristian Del Fabbro is Assistant Researcher at the Department of Agricultural and Environmental Sciences at the University of Udine, Italy. He is also a scientific collaborator for IGA foundation (Udine, Italy). His main scientific interests are:

- programming;
- bioinformatics;
- epigenomics and methylation;
- algorithms for short read alignments.

education

2006–2010	PhD in Computer Sciences Thesis title: <i>Repeated sequences in bioinformatics: assembly, annotation and alignments.</i> Supervisor: Prof. Alberto Policriti.	University of Udine, Italy
1996–2005	Master degree in Computer Sciences Thesis title: <i>Applicazione di tecniche di model checking all’analisi di sistemi biologici (Model checking techniques applied to the analysis of biology systems).</i> Supervisor: Prof. Alberto Policriti. Co-supervisor: Dr. Carla Piazza.	University of Udine, Italy

experience

2014–Now	Department of Agriculture and Environmental Sciences <i>Assistant Researcher</i> Research unit responsible for the Project “The Epigenomic Plasticity of Grapevine in Genotype by Environment (GxE) Interactions”, for the epigenetic analysis of the grapevine’s methylome.	University of Udine, Italy
2012–2014	Istituto di Genomica Applicata <i>Researcher</i> Development of new algorithms and tools to align and analyse short read produced using Bisulfite protocol. The work was supported by “EPIGEN - progetto bandiera epigenomica” italian project.	Udine, Italy
2009–2011	Department of Agriculture and Environmental Sciences <i>Post-Doc</i> Project, analysis, and development of alignment algorithms for short reads produced by Next Generation Sequencers.	University of Udine, Italy
2006–2011	Istituto di Genomica Applicata <i>Scientific collaborator</i>	Udine, Italy
2006–2009	Department of Mathematics and Computer Sciences <i>PhD student in Computer Sciences</i> Development of tools for assembly, repeated sequences detection and short read alignment.	University of Udine, Italy
2005	Department of Agriculture and Environmental Sciences <i>System administrator</i> DNA of trees: applications and database.	University of Udine, Italy
2002–2004	Department of Biomedical Sciences and Technologies <i>System administrator</i> Server administration for web, email, print and backup services.	University of Udine, Italy

2002–2004	Department of Mathematics and Computer Science <i>System administrator</i> Computer laboratory system administrator.	University of Udine, Italy
1999–2001	Department of Economy <i>System administrator</i> Computer laboratory system administrator.	University of Udine, Italy

projects

- 2014–Now **The Epigenetic Plasticity of Grapevine in Genotype by Environment (GxE) Interactions**
 FIRB “Futuro in ricerca” italian project, coordinator Dr. Silvia Dal Santo, University of Verona.
 My role: *research unit responsible* (epigenetic analysis).
- 2011–Now **Epigen (Italian Flagship Project)**
 Coordinator Prof. Giuseppe Macino, La Sapienza University, Rome; research unit responsible Prof. Alberto Policriti, University of Udine.
 My role: development of novel algorithm for epigenomic alignment and analysis.
- 2010–2013 **Functional genomics, genetic improvement and innovations for the promotion of the products of the citrus industry - PON01_01623**
 Through application of functional genomics, genetic improvement-oriented, and innovative technologies, the aim is to predict the behavior of citrus' species and varieties from the point of view of adaptability to different climatic conditions. Through genomic analysis will address the problems associated with the genetic basis of morphological characteristics, productive and adaptive species, in order to analyze together the complex genetic systems that regulate the interactions and their modulation in response to environmental stimuli. Particular attention is given to the stress and resistance of biotic and abiotic stress factors.
- 2009–2013 **DRUPOMICS - Deciphering Peach Genomics and Mas Improving in Stone Fruits Crops**
 The project is split in 3 phases. The first phase deals with genome sequencing of a peach double haploid genotype. It is carried out in cooperation with USA partners (Clemson University and the Joint Genome Institute) and is based on an integrated approach (6X Sanger and 15X 454/Solexa sequencing) that will produce sequences for a 21X genome coverage. The second phase is committed to the development of molecular tools (EST collections, genetic maps) for mapping and cloning genes/QTLs of interest for peach and apricot breeding. The major traits object of study are fruit quality and ripening and resistance to several diseases. The last phase deals with the management of information: creation of dbases, development of interactive web sites.
- 2009–2010 **Noveltree (FF7-211868)**
 NovelTree is designed to enable significant genetic improvement of tree characteristic sand forest products properties to satisfy the needs (quality, quantity, sustainability, vulnerability) of the forest-based sector and consumers. The challenges facing forest geneticists and tree breeders include recognition of changing demands on forests for a wider range of high value forest products and sustainability of forest ecosystems under climate change.

2006–2010 Structural and Functional Characterization of the Grape Genome - VIGNA (Vitis GeNome Analysis)

The project aims to apply advanced genome analysis methods to broaden our appreciation of the genetic information contained in the grape genome. This will allow us to understand the complex genetic systems that govern developmental and physiological processes as well as mechanisms of response to environmental stimuli. Understanding these processes is fundamental to the development of new theoretical concepts and molecular tools for the evaluation and characterization of the genetic resources available to modern viticulture. The project aims to contribute to the growth of Italian and European viticulture in the 21st century in harmony with the principle that scientific knowledge should facilitate the combination of traditional methods with technological innovation.

expertises

Bioinformatics skills:

- assembly (Arachne, PCAP);
- long reads alignment (BLAST, BLAT, crossmatch);
- short reads alignment (ERNE, BWA, Bowtie2)
- transposable elements discovery and annotation (RepeatMasker, ReAS)
- methylome alignment (ERNE) and analysis (NGSTOOLS)
- development of ad-hoc scripts and programs

Programming languages:

- *Skilled level:* C++, Java, Perl, Python;
- *Basic level:* Basic, Fortran, Javascript, Mathematica, Matlab, Pascal, R, PHP, Prolog.

IT Professional skills:

- *Operating Systems:* GNU/Linux (Ubuntu, Debian, CentOS, RedHat), OSX, Windows;
- *Development software and library:* Autoconf, BOOST, Eclipse, Subversion, MPI, Mercurial;
- *Service software:* Apache, DNS, EXIM/Postfix, Mysql/Postgres, CMS, Samba, Nexentastor.

open source software (development)

ERNE

🔗 <http://erne.sf.net>

ERNE (Extended Randomized Numerical alignEr) is a short string alignment package whose goal is to provide an all-inclusive set of tools to handle trimming and alignment for short (NGS-like) reads. ERNE comprises ERNE-MAP (core alignment tool/algorithm), ERNE-BS5 (bisulfite treated reads aligner, [1]), ERNE-FILTER (quality trimming and contamination filtering, [4]), and parallel version of the aligners (ERNE-PMAP and ERNE-PBS5, [5]).

LIBBIOCPP

🔗 <http://libbiocpp.sf.net/>

LIBBIOCPP is a library wrote in C++ for bioinformatics people. The library provides interfaces to parse commonly used bioinformatics files (e.g., FASTA, FASTQ, SAM/BAM, WIG) and some data structure and algorithms for performe analysis (e.g., genome representations, short read analysis).

NGS-SUITE

🔗 <http://ngs-suite.sf.net/>

NGS-SUITE is a set of tools (based on LIBBIOCPP) that perform a wide spectrum of statistics and analysis about NGS-like data (e.g., statistics about alignments, coverage profile creation, smallRNA trimming).

rNA <http://iga-rna.sf.net>
rNA (randomized Numerical Aligner, [13]) is a short string alignment tool to trim and align reads. There is also a parallel version optimized for MPI-based clusters [6]. rNA is no more maintained: the code was exported and improved in ERNE software.

GAM <http://services.appliedgenomics.org/software/gam/>
GAM (Genomic Assembler Merger, [2]) is a software tool to integrate two different assemblies (produced using Sanger long reads) and improves the overall quality of the genome sequences by merging them.

teaching

- 2012/13 **Technology and design of computer systems and telecommunications** (G.Bearzi High School, Udine, Italy)
- 2012/13 **Laboratory of Computer Systems and Networking** (G.Bearzi High School, Udine, Italy)
- 2012/13 **Laboratory of Algorithms and Data structures** (Department of Computer Science, University of Udine, Italy)
- 2012/13 **Laboratory of Computer Systems and Networking** (G.Bearzi High School, Udine, Italy)
- 2011/12 **Laboratory of Algorithms and Data structures** (Department of Computer Science, University of Udine, Italy)
- 2011/12 **Laboratory of Computer Systems and Networking** (G.Bearzi High School, Udine, Italy)
- 2010/11 **Laboratory of Algorithms and Data structures** (Department of Computer Science, University of Udine, Italy)
- 2009/10 **Bioinformatics** (interfaculty course, University of Trieste, Italy)
- 2008/09 **Informatic** (Biotechnology interfaculty course, University of Udine, Italy)
- 2007/08 **Informatic** (Biotechnology interfaculty course, University of Udine, Italy)

other activities

- 2015 Organization and speaker for the workshop **On top of genomics**
- 2013 Organization of the **BITS Annual Meeting 2013**
- 2012 Organization of the **BCI 2012 (Biology, Computation and Information)** summer school
- 2012 Organization and speaker for the **NGS Training Workshop 2012 - Data Crunching: from hell to heaven**
- 2011 Organization of the **IGA Summer School 2011. Next Generation Sequencing: from samples to data analysis**
- 2010 Organization of the **BCI 2010 (Biology, Computation and Information)** summer school
- 2008 Organization of the **BCI 2008 (Biology, Computation and Information)** summer school
- 2007 Organization of the **BCI 2007 (Biology, Computation and Information)** summer school
- 2006 Organization of the **BCI 2006 (Biology, Computation and Information)** summer school

contests

1997–2000 ACM International Collegiate Programming Contest: University of Ulm (Germany, 1997), University of Valladolid (Spain, 1998), University of Valladolid (Spain, 1999) - best rank: 3, University of Porto (Portugal, 2000).

1995 Italian mathematics contest, Bocconi university, Milano (Italy). Final rank: 8.

summary

Cristian Del Fabbro formation starts as computer scientist but since 2005, with its Master Degree thesis (“Applicazione di tecniche di model checking all’analisi di sistemi biologici” - “Model checking techniques applied to the analysis of biology systems”) taken at University of Udine, he approached to the bioinformatics area. In 2006 he started the PhD student program in the University of Udine and it was involved in the first steps of the preparation of IGA’s laboratory: LIMS (Laboratory Information Management System), computational services, system administrator, and—last but not least—bioinformatics research for the IGA. In its four years as PhD computer science student and in the following 2 years as post-doc (either in University of Udine) he was involved in a lot of aspect of biological data manipulation, computation and analysis, from the “old-era” generation sequencers (ABI3730) to the Next Generation Sequencers (Illumina).

In 2010 he defends its PhD thesis “Repeated sequences in bioinformatics: assembly, annotation and alignments” a summary of its experiences in genome assembly, transposable elements detection and annotation, and short reads aligners. As post-doc he continued to work, principally, on the enhancement of short reads aligners. He worked on a tool called rNA (randomized Numerical Aligner, [13]) that it is able to efficiently and accurately aligns DNA/RNA short reads. He worked also on a distributed version of rNA, called mrNA [6] that can take advantages of cluster of computer.

In 2012 he became a member of the “EPIGEN - progetto bandiera epigenomica” project whose aim is to discover and analyse the role of the epigenetic modifications between individuals. Within this project he contributed to the realization of the ERNE (Extended Randomized NumErical - <http://erne.sf.net>) suite of aligners program. In the suite it is presented the ERNE-BS5 aligner [11]. ERNE-BS5 is a short read aligner able to align reads produced using BS-seq protocol.

In 2013 he won a FIRB - “Futuro in ricerca” grant for the project “The Epigenomic Plasticity of Grapevine in Genotype by Environment (GxE) Interactions”, a joint work of three research units with different expertise. Together with Silvia Del Santo (project coordinator, University of Verona) and Irene Perrone (University of Turin), the transcriptome and methylome of two grapevine varieties will be sequenced and analyzed to detect the modifications induced by the climate changes.

He contributed to the assembly and the analysis of several genomes: barley, citrus [14], grapevine [8, 9], maize, peach [12], poplar, and many more.

- [37] C. Cattonaro, **C. Del Fabbro**, and The French-Italian Public Consortium for Grapevine Genome Characterization, "Application of Illumina Genome Analysis platform and Whole Transcriptome Analysis for grape genome annotation," in *Illumina Usermeeting 2008*, (Rottach-Egern, Germany), May 8-9, 2008.
- [38] F. Cattonaro, V. Vendramin, **C. Del Fabbro**, A. Stefan, S. Sugavanam, G. Di Gaspero, P. Wincker, F. Quetier, G. Valle, A. Policriti, and M. Morgante, "Whole genome resequencing of the *Vitis vinifera* cultivar Tocai Friulano: shotgun synthenic assembly on Pinot Noir genotype PN40024 reference sequence and detection of structural variation," in *6. Plant Genomics European Meeting*, (Tenerife), October 3-6, 2007.

- [39] D. Copetti, V. Vendramin, **C. Del Fabbro**, A. Stefan, F. Cattonaro, M. Pè, A. Policriti, and M. Morgante, “Abundance, distribution, and variation of transposable elements in the grapevine genome,” in *FISV 2008*, (Rive del Garda, Italy), September 20-24, 2008.
- [40] D. Copetti, V. Vendramin, **C. Del Fabbro**, S. Swaminathan, A. Stefan, A. Brindisi, F. Cattonaro, F. Quetier, O. Jaiillon, M. Pè, A. Policriti, and M. Morgante, “Abundance, distribution and variation of transposable elements in the grapevine (*Vitis vinifera L.*) genome,” in *I/CTE 2008*, (Saint Malo, France), April 20-23, 2008.
- [41] E. De Paoli, M. Celii, G. Magris, **C. Del Fabbro**, E. Paparelli, F. Marroni, and M. Morgante, “The Epigenetic Impact of Structural Variation in the Grapevine,” in *SIGA 2015*, (Milan, Italy), 2015.
- [42] **C. Del Fabbro**, “NGS-SUITE, an efficient set of programs for NGS data analysis and manipulation,” in *BITS 2015*, (Milan, Italy), June 3-5, 2015.
- [43] **C. Del Fabbro**, “ERNE-BS5: Aligning BS-treated Sequences by Multiple Hits on a 5-letters Alphabet,” in *Next Generation Sequencing & Epigenomics, fourth Bari workshop*, (Bari, Italy), December 5-7, 2012.
- [44] **C. Del Fabbro**, D. Copetti, A. Brindisi, A. Policriti, and M. Morgante, “Combining Evidences For Repeats Annotation,” in *SIGA 2007*, (Rive del Garda, Italy), September 23-26, 2007.
- [45] **C. Del Fabbro**, M. Morgante, and A. Policriti, “Fast: Fast Alignments for Short Tags,” in *BITS 2009*, (Genova, Italy), March 18-20, 2009.
- [46] C. Forestan, **C. Del Fabbro**, S. Farinati, A. Lunardon, and S. Varotto, “Monitoring stress-induced genetic and epigenetic changes in the transcriptome of *Zea mays*,” in *SIGA 2013*, (Foggia, Italy), September 16-19, 2013.
- [47] S. Giacomello, G. Zaina, **C. Del Fabbro**, S. Scalabrin, F. Cattonaro, G. Taylor, P. Faivre-Rampant, and M. Morgante, “Oncoming future in *Populus nigra*: improved breeding programs by next-generation sequencing applications,” in *Fifth EPSO Conference*, (Lapland, Finland), 29 August - 2 September, 2010.
- [48] S. Giacomello, G. Zaina, **C. Del Fabbro**, S. Scalabrin, F. Marroni, S. Pinosio, N. Felice, F. Cattonaro, and M. M., “Analysis of whole-genome genetic variation using next-generation sequencing to improve breeding programs in *Populus* trees,” in *SIGA 2010*, (Matera, Italy), September 28-30, 2010.
- [49] S. Giacomello, G. Zaina, F. Marroni, S. Pinosio, **C. Del Fabbro**, S. Scalabrin, F. Cattonaro, P. Faivre-Rampant, F. Bitton, M. Le Paslier, D. Brunel, S. Schlub, V. Jorge, J. De Woody, M. Sabatti, W. Boerjan, G. Taylor, C. Bastien, and M. Morgante, “Next-generation sequencing as source of SNP and structural variants information to improve breeding programs in *Populus nigra*,” in *Fifth International Poplar Symposium*, (Orvieto, Italy), September 20-25, 2010.
- [50] S. Giacomello, G. Zaina, S. Scalabrin, **C. Del Fabbro**, V. Zamboni, A. Gervaso, N. Felice, S. Schlub, M. Le Paslier, D. Brunel, J. De Woody, F. Cattonaro, C. Bastien, V. Jorge, G. Taylor, P. Faivre-Rampant, , and M. Morgante, “Sequence And Polymorphism Map Of The *Populus Nigra* Genome From A de novo Assembly Approach,” in *Plant and Animal Genome*, (San Diego, USA), January 15-19, 2011.
- [51] S. Giacomello, G. Zaina, F. Vezzi, S. Scalabrin, **C. Del Fabbro**, A. Gervaso, V. Zamboni, N. Felice, F. Cattonaro, and M. Morgante, “De Novo assembly and comparative genomics analysis in *populus Nigra*,” in *36th FEBS Congress, Biochemistry for Tomorrow’s Medicine*, (Torino, Italy), June 25-30, 2011.
- [52] M. Massaro, N. Tomasi, E. De Paoli, L. Zanin, **C. Del Fabbro**, M. Morgante, and R. Pinton, “Nutritional stress and epigenetic variations in plants,” in *SICA Ph.D. Winter School, Feeding the world: the contribution of research in agricultural chemistry to sustainable development*, (Piacenza, Italy), February 9-12, 2015.
- [53] M. Miculan, S. Scalabrin, F. Vezzi, F. Nadalin, **C. Del Fabbro**, A. Policriti, D. Trebbi, G. Di Gaspero, F. Cattonaro, R. Testolin, and M. Morgante, “Reconstructing The Whole Genome Of Sangiovese, A Red Italian Wine Variety: Resequencing And de novo Assembly,” in *Plant and Animal Genome*, (San Diego, USA), January 15-19, 2011.

- [54] S. Scalabrin, A. Policriti, F. Nadalin, **C. Del Fabbro**, M. Miculan, S. Pinosio, F. Cattonaro, E. Vendramin, V. Aramini, I. Verde, L. Rossini, R. Testolin, and M. Morgante, “A catalog of molecular diversity within *Prunus* germplasm inferred from next-generation sequencing data: bioinformatic approaches and challenges,” in *Joint AGI-SIBV-SIGA congress*, (Assisi, Italy), September 19-22, 2011.
- [55] E. Vendramin, S. Scalabrin, N. Felice, **C. Del Fabbro**, V. Aramini, M. Dettori, R. Quarta, F. Cattonaro, M. Morgante, and I. Verde, “Whole-genome transcriptional landscape definition and gene annotation improvement in peach by RNA-seq on Illumina platform,” in *SIGA 2010*, (Matera, Italy), September 28-30, 2010.
- [56] V. Vendramin, S. Radovic, S. Scalabrin, I. Jurman, **C. Del Fabbro**, F. Cattonaro, B. Steuer-nagel, N. Stein, and M. Morgante, “The analysis of 400 Mbp BAC-ends sequences (BES) data exposes the barley genome repetitive fraction composition,” in *SIGA 2010*, (Matera, Italy), September 28-30, 2010.
- [57] I. Verde, F. Cattonaro, S. Scalabrin, E. Vendramin, A. Policriti, **C. Del Fabbro**, R. Quarta, M. Dettori, B. Sosinski, and M. Morgante, “SNP Discovery in Peach Germplasm Using Next Generation Sequencing Platform,” in *Plant and Animal Genome XVIII Conference*, (San Diego, USA), January 9-13, 2010.
- [58] I. Verde, F. Cattonaro, S. Scalabrin, V. Vendramin, A. Policriti, **C. Del Fabbro**, R. Quarta, V. Aramini, M. Dettori, D. Rokhsar, B. Sosinski, and M. Morgante, “Whole Genome Re-sequencing Reveals A Reduced Nucleotide Variability In Peach,” in *Plant and Animal Genome*, (San Diego, USA), January 15-19, 2011.
- [59] F. Vezzi, **C. Del Fabbro**, A. Tomescu, N. Prezza, and A. Policriti, “ERNE: a multi-purpose alignment package,” in *Bioinformatics 2012*, (Stockholm, Sweden), June 11-14, 2014.
- [60] G. Zaina, **C. Del Fabbro**, F. Cattonaro, W. Boerjan, and M. Morgante, “Sequence variability and heterosis in poplar species,” in *6. Plant Genomics European Meeting*, (Tenerife), October 3-6, 2007.
- [61] G. Zaina, **C. Del Fabbro**, F. Cattonaro, and M. Morgante, “Sequence variability and heterosis in poplar species,” in *FISV 2007*, (Riva del Garda, Italy), September 26-29.
- [62] G. Zaina, **C. Del Fabbro**, F. Cattonaro, and M. Morgante, “Detection of structural variation among interfertile *Populus* species,” in *FISV 2008*, (Rive del Garda, Italy), September 20-24, 2008.
- [63] G. Zaina, **C. Del Fabbro**, F. Cattonaro, and M. Morgante, “Structural and nucleotide variation among *Populus* genomes,” in *SIGA 2008*, (Padova, Italy), September 14-17, 2008.
- [64] G. Zaina, S. Giacomello, **C. Del Fabbro**, S. Scalabrin, F. Marroni, S. Pinosio, F. Cattonaro, V. Jorge, P. Faivre-Rampant, F. Bitton, M. Le Paslier, D. Brunel, S. Schlub, M. Sabatti, W. Boerjan, G. Taylor, C. Bastien, and M. Morgante, “Exploiting next-generation sequencing to obtain a whole-genome SNP collection in black poplar (*Populus nigra L.*),” in *Forest ecosystem genomics and adaption*, (San Lorenzo de El Escorial, Spain), June 9-11, 2010.
- [65] G. Zaina, S. Giacomello, S. Scalabrin, F. Marroni, S. Pinosio, **C. Del Fabbro**, V. Zamboni, A. Gervaso, N. Felice, S. Schlub, M. Le Paslier, D. Brunel, F. Cattonaro, C. Bastien, V. Jorge, G. Taylor, P. Faivre-Rampant, and M. Morgante, “Naturally Occurring Genetic Variation in 48 *Populus nigra* Genomes using Next-Generation Sequencing,” in *The 9th Plant Genomics European Meeting*, (Istanbul, Turkey), May 04-07 2011.
